# viewneo® Diwa

## A DISPLAY CONTROLLED BY THE CLOUD

Things are always changing in the restaurant business, like your menu. When you offer everything from breakfast to happy hour and romantic dinner specials, you have to juggle different menus.

But there has to be an easier way than having to print new menus every time there is a change. With the viewneo Diwa, you can save both time and money. Thanks to the cloud connection, you can adjust the content on each display in just one step. Combining digital and simplicity, as easy as writing on a chalkboard.

## Advantages of the viewneo Diwa

- ✔ Use timers to automate content changes
- ✔ Control individually or as a group
- ✔ Write and transfer content via app, or in the viewneo CMS
- ✔ WiFi connectivity
- ✔ Energy-efficient E-Paper Display
- ✔ Lithium-ion battery for extended battery life
- ✔ Easy to read in direct sunlight
- ✔ High-quality custom materials designed to match any decor

# Technology packaged in an elegant design
## Digitization with the charm of chalkboard

**High-quality Aluminum frame** with a brushed or grooved finish

Power saving **E-Paper Display** is readable in even the brightest sunlight

**From one device to a hundred,** connect your content with an app on an iPad or with the viewneo CMS

Integrated microcontroller with built-in **WiFi** allows for local and worldwide control

**High-quality stand** available in walnut, oak, or even bamboo. Alternatively, in concrete to match a variety of different decors

## Easily integrate with Digital Signage

viewneo Diwa can be connected with the viewneo Digital Signage cloud. This means that you can use your content across all of your platforms, including digital menu boards.

It also helps to improve corporate communication by allowing all created content to be saved for future use.

Additionally, corporate design guidelines can be shared across multiple geographic locations to allow for easier central management.
